Proposal for James Burner at Endline Corporation

Prepared by LazyBird AI · 09-13-2026

Overview

Endline Corporation aims to enhance its customer support operations by automating key workflows such as ticket triage and information retrieval, while also deploying basic chatbots to handle repetitive inquiries. The primary challenge lies in reducing manual support efforts and improving response efficiency through intelligent automation. This project focuses on leveraging existing documentation and internal systems to streamline support functions.

Recommended Package

Support Automation & Chatbot Suite

Scope of Work

Our team will implement AI-powered automation workflows to streamline support ticket triage and facilitate quick retrieval of information from your existing documentation. Additionally, we will design and build basic support chatbots tailored to your needs, capable of addressing common customer inquiries and guiding users effectively. We will also provide integration support to ensure seamless operation within your current systems and workflows.

Deliverables

- Automated support workflow design and implementation
- Custom support chatbot development
- Integration of AI solutions with existing systems
- Training and documentation for support team
- Post-deployment support and monitoring

Timeline

4-6 weeks

Investment

\$25,000 - \$30,000

Why LazyBird AI

We build automation systems that work end to end, not disconnected tools you have to stitch together yourself. Every system we deliver is documented and handed over so your team can run it without depending on us.

We stay narrow on purpose: AI-driven qualification, outreach, and internal process automation. That focus is why we can move in weeks rather than quarters.

Terms

This proposal is valid for 30 days from the date above.

Payment is structured as 50% on project commencement and 50% on final delivery.

Timeline begins from the date of the signed agreement and receipt of the initial payment.

Any work requested outside the scope defined above will be quoted separately before commencement.
